

THE NEW SPANN-TWIST MAKES **CHAIN TENSIONING ULTRA-LIGHT.**

Hybrid solution combining 3D-printed lightweight design and MURTFELDT Original "S"® material

NOW AVAILABLE!

**WHEN SPACE, WEIGHT AND MAINTENANCE
BECOME LIMITING FACTORS**

In many applications, chain tensioning runs unnoticed – until three things suddenly become critical:
too heavy, too bulky, too maintenance-intensive.

OUR SOLUTION: SPANN-TWIST

With the Spann-Twist, we have rethought chain tensioning:
a hybrid design combining an additively manufactured lightweight body with proven MURTFELDT Original "S"® material.

BECAUSE LESS IS MORE

- ↓ **Less weight**
Ideal for dynamic applications and sensitive designs
- ↓ **Reduced maintenance**
Optimised sliding properties for longer service life

- ↑ **More design freedom**
Compact construction for tight installation spaces
- ↑ **High stability despite lightweight design**
Reliable even under demanding conditions
- ↑ **Extended tensioning range**
Versatile within a clearly defined working area

IDEAL FOR

- + **Applications with limited installation space**
- + **Special-purpose machinery**
- + **Customised system designs**
- + **Retrofit & optimisation of existing systems**
